

FRONT-END DEVELOPER

Portfolio: Venkatesh-Pothamsetty.com

SUMMARY

Frontend developer with around 3 years of experience building web applications using React, JavaScript, and TypeScript. Experienced in developing data-driven interfaces, dashboards, and scalable UI components with a focus on performance and usability. Also have hands-on experience in AWS cloud hosting, deployment, and infrastructure support. Comfortable working in Agile teams and delivering reliable features end-to-end.

TECHNICAL SKILLS

- **Languages:** JavaScript (ES6+), TypeScript
- **Frontend:** React, HTML5, CSS3, responsive design
- **Cloud & DevOps:** AWS (EC2, S3, CloudFront, IAM, CloudWatch), CI/CD basics
- **Concepts:** Data structures, problem solving, performance optimization
- **APIs:** REST APIs, async data handling
- **Tools:** Git, GitHub, npm, browser DevTools
- **Testing:** Jest (basic familiarity)
- **Practices:** Agile (sprint planning, stand-ups, code reviews)

PROFESSIONAL EXPERIENCE

Freelance Web Developer (React / TypeScript)

Self-Employed | Jan 2024 – Present

- Built dashboards and data-driven web applications using React
- Developed reusable components and structured UI for dynamic datasets
- Integrated APIs and handled asynchronous data flows
- Improved performance for applications handling large data
- Focused on clean, maintainable code

Projects

- **Vikas Hospitals Platform**(vikashomoeo.com)
 - Designed and implemented responsive UI systems and interactive user workflows.
- **Street Sight Web Application** (Streetsight.ca)
 - Built reusable React components and integrated data APIs for responsive user interfaces

Software Developer- Front End

Tata Consultancy Services (TCS), India | Oct 2022- March 2024

- Built and maintained web applications using React, TypeScript, HTML, and CSS
- Developed reusable UI components to support scalable application features
- Integrated REST APIs and handled dynamic data rendering
- Debugged production issues and improved application performance
- Collaborated with backend and QA teams to deliver features
- Participated in Agile development (stand-ups, sprint planning, reviews)

AWS DevOps Engineer

Tata Consultancy Services (TCS), India | March 2022- August 2022

- Managed and deployed web applications on AWS infrastructure (EC2, S3, CloudFront)
- Configured secure hosting environments using IAM roles and access policies
- Monitored application performance and logs using CloudWatch
- Assisted in setting up CI/CD pipelines for automated deployment
- Troubleshot hosting, networking, and deployment issues in production environments
- Supported scalability and availability improvements for cloud-hosted applications

Software Engineer Intern

Inventrux, India | August 2021 – Feb 2022

- Developed UI components using React and JavaScript
- Integrated APIs and assisted with debugging
- Improved UI behaviour and code structure

PROJECTS

Street Sight – AI-Driven Outdoor Advertising Management Platform

Full-Stack Developer | React, Node.js, MongoDB, AWS, TypeScript

- Built interactive dashboards displaying dynamic datasets using charts and graphs
- Implemented real-time UI updates and optimized rendering performance
- Designed reusable visualization components for scalable data interfaces

Kyntra- Healthcare Mobile Application

Full-Stack Developer | AI-Enabled Healthcare Mobile Application

- Built UI workflows including chatbot and video features
- Developed responsive components for user interactions

EDUCATION

- **Post-Graduate Diploma – Web & Mobile Application Development**
Langara College, Canada | April 2024 – December 2025
- **Bachelor of Technology – Computer Science**
Krishna Chaitanya Institute of Technology and Sciences, India | 2021
